(D) Administrative adjudication

30. The element of ‘immemorial antiquity’ is concerned with:

- (A) Custom (B) Precedent (C) Juristic Writing (D) Legislation

General English

31-34. Read the following passage and choose the correct answer from the choices given

Countless studies have found that generosity, both volunteering and charitable donations, benefits young and old physically and psychologically. “Volunteering moves people into the present and distracts the mind from the stresses and problems of the self,” said Stephen G. Post, founding director of the Center for Medical Humanities. “Many studies show that one of the best ways to deal with the hardships in life is not to just center on yourself but to take the opportunity to engage in simple acts of kindness.” Studies show that when people think about helping others, they activate a part of the brain called the mesolimbic pathway, which is responsible for feelings of gratification.

Helping others doles out happiness chemicals, including dopamine, endorphins that block pain signals and oxytocin, known as the tranquillity hormone. Even just the thought of giving money to a specific charity has this effect on the brain, research shows. Intuition tells us that giving more to oneself is the best way to be happy. But that’s not the case, according to Dan Ariely, Professor of Behavioural economics and psychology at Duke University. “If you are a recipient of a good deed, you may have momentary happiness, but your long-term happiness is higher if you are the giver,” Ariely said. For example, if you give people a gift card for a Starbucks cappuccino and call them that evening and ask how happy they are, people say they are not happier than if you hadn’t given it to them. If you give another group a gift card and ask them to give it to a random person, when you call them at night, those people are happier. “People are happier when they give, even if they’re just following instructions,” Ariely said. “They take credit for the giving and therefore are happier at the end of the day.” The way we give is important, too, Ariely said. Taxes are a form of giving that typically does not make Americans happy. “If you give directly from a pay check, we don’t pay attention to it,” he said. “It’s the way we give and how we give that makes us happy. The key is to give deliberately and thoughtfully so that other people benefit from it.” Research supports this, and researchers started from a baseline of equal physical characteristics among study participants, so it was not a case of healthier people being more willing to volunteer. [Source: By Terri Yablonsky, originally published on Republican-American, September 2015]

Choose the correct option (31-34, based on the passage given)

31. Numerous studies have shown that _____ in the form of volunteering and charity gifts, helps us in terms of physical and mental health.

- (A) Volunteering (B) Kindness (C) Meanness (D) Happiness

32. "Mesolimbic pathway" is a part of the brain that gets activated when one thinks of helping others. Which of the following best describes the feelings generated as a result of this activity?

- (A) Meagre (B) Restraint (C) Aversion (D) Delight

33. Dopamine and endorphins prevent pain signals, and oxytocin when

- (A) You centre on yourself (B) You receive a gift
(C) You help others (D) None of the above

34. Which of the following best describes the main idea of the passage?

- (A) Helping others is a simple way to stay healthier
